Dear Kadri,

thank you for publishing our article in Global Journal of Medicine  
and Public health

There are several topics from my friend want to send to you,  
commonly talk nutrition issues.

some of my friend have seen this website, but i seem not  
communicative and little bit difficult to understand, they said the  
international journal of Public health (You are also the editorial  
board) is better, and attractive as having pdf file and having ISSN

**Subject: Work philosophy of the Editorial members**

Dear All,

It gives us immense pleasure to launch the first edition of Global J of Medicine and Public Health [www.gjmedph.org](http://www.gjmedph.org) (Peer reviewed International Journal), for the public health and dedicated to Health Professionals in developing countries.

The Innovation of this journal is expressed through two main elements:

- Specialized skills of Board members, in order to publish quality research papers and thanks to electronic exchanges and web conferences between [editorial members](#).

- Many authors, all over the world, contributed to its edition and its evolution, including authors from developed countries. Below, you can see the table of contents of the first edition.

It is a real effort of mixing of ideas, to enhance the global scientific knowledge in public health.

You can [submit an article](#) related with all topics in Public Health, Medicine, and Social Sciences.

Kindly disseminate this first edition all over the world, by sending it in your personal health network. It will contribute to increase the network and propose to future authors to participate and share the knowledge.

Articles are invited for coming issue of Journal, articles can be submitted online <http://www.gjmedph.org/SubmitManuscript.aspx>

Sincerely,

Stéphanie Patin  
Kadri,  
Associate editor
